EMOHA ELDER CARE

Product Requirements Document

Concierge Service Landing Page | www.emoha.com/offers

Document Version	v1.0
Status	Draft — For PM Review
Date	Aug 2021
Prepared By	Product Team
Stakeholders	Marketing, Design, Operations, Partner Brands, Senior Management
Platform	Web — www.emoha.com/offers
Industry	Elder Care / Senior Wellness

1. Executive Summary

Emoha Elder Care requires a dedicated Concierge Service landing page at www.emoha.com/offers. The current website has no centralized page to explain, promote, or convert visitors on the concierge program. This PRD defines the product vision, functional requirements, user stories, success metrics, and annotated wireframes for Version 1 of this page.

The landing page will act as the primary digital touchpoint for seniors and their families to understand the concierge programme, discover partner brand offers, explore exclusive Assure Deals, and initiate enquiries. A future-ready advertisement slider placeholder will also be included for Phase 2 monetization.

2. Product Vision & Goals

2.1 Vision Statement

To create a trusted, senior-friendly digital hub that clearly communicates the value of Emoha's Concierge Service, drives user engagement through curated deals and partner showcases, and lays the foundation for future revenue streams.

2.2 Business Objectives

- Create 100% dedicated digital visibility for the concierge offering.
- Reduce sales-team manual explanation effort by 50% through self-serve content.
- Increase partner brand visibility and strengthen credibility.
- Drive measurable uplift in concierge enquiries and sign-ups.
- Establish an advertisement slot for future monetization (Phase 2).

3. Problem Statement

3.1 Current Pain Points

The following gaps have been identified in the existing digital experience:

- No concierge-specific page exists on the website — zero discoverability.
- Partner brands are not showcased, reducing trust and conversion potential.
- Exclusive deals (Assure Deals) are not visible to users, losing conversion opportunities.
- Sales team invests significant time manually explaining the concierge service.
- No digital space for future advertisement-based revenue generation.

3.2 Impact of the Problem

- Low awareness and adoption of the concierge programme.
- Missed partner marketing revenue.
- High CAC (Customer Acquisition Cost) due to manual sales effort.

4. Success Metrics (KPIs)

Metric	Target / Expected Improvement
Concierge page monthly visits	80% increase within 3 months of launch
Customer enquiries via CTA	40–50% increase MoM
Engagement rate — Partner Brand section	30%+ scroll/click rate
Average time on page	2× increase vs site average
Lead conversion via CTA buttons	Measurable positive uptick
Bounce rate	Below 55%
Future ad revenue (Phase 2)	New monetisation channel unlocked

5. Scope

5.1 In Scope — Phase 1

- Landing page structure and information architecture
- Hero section with headline, sub-headline, and primary CTA
- Concierge service overview with icons
- Key benefits section (card/grid layout)
- Partner brands showcase (carousel or grid)
- Assure Deals section with offer cards
- Special care services section
- FAQ section
- Multiple CTA buttons at key touchpoints
- Advertisement slider placeholder (non-functional)
- Footer with contact info, WhatsApp/call, social media, quick links
- SEO-optimised content and meta tags
- Category and Location filter dropdowns (per wireframe)

5.2 Out of Scope — Future Phases

- Payment gateway integration
- User login / membership portal
- Dynamic deal updates via admin CMS
- Ad network integration and live ad serving
- Mobile app version

6. User Personas

6.1 Primary — Adult Child / Family Caregiver

Age 35–55 | Researching care options for elderly parent | Needs trust signals, clear service explanation, and easy contact options.

6.2 Secondary — Senior Member

Age 65+ | Looking for curated deals and premium care services | Needs large text, simple navigation, and phone-based CTA.

6.3 Internal — Marketing Team

Needs a page that supports partner brand activations, SEO campaigns, and future ad placements.

---

7. User Stories & Acceptance Criteria

US-01: Understand the Concierge Service

As a website visitor, I want to clearly understand what the Concierge Service offers, so I can decide if it is right for my elderly family member.

Acceptance Criteria

- Page describes the service in plain, jargon-free language.
- Visual icons accompany each service category for quick comprehension.
- Service overview is visible above the fold on desktop and mobile.

US-02: View Partner Brands

As a customer, I want to see which brands are partnered with Emoha, so I can trust the quality of recommended services.

Acceptance Criteria

- Partner logos load within 2 seconds and render at full clarity.
- Section supports easy addition/removal of brand logos without code change.
- Logo grid is responsive across desktop, tablet, and mobile viewports.

US-03: Explore Exclusive Deals

As a user, I want to view all current Assure Deals, so I can save money on care-related services.

Acceptance Criteria

- Deal cards display brand name, discount percentage, service description, validity date, and CTA button.
- Deals are filterable by Category and Location dropdowns.
- A 'Featured Deal of the Week' card is highlighted prominently.

US-04: Filter Offers by Location & Category

As a user in Delhi NCR, I want to filter deals by my location, so I only see offers available near me.

Acceptance Criteria

- Category dropdown lists all concierge subcategories (Lab & Diagnostic, Doctor's Consultation, Home Services, etc.).
- Location dropdown includes Delhi NCR and Pan India options.
- Selecting a filter updates the offer cards without full page reload.

US-05: Future-Ready Advertisement Slot

As the Marketing Team, we want a placeholder advertisement slider, so we can activate paid advertising in Phase 2 without re-engineering the page.

Acceptance Criteria

- Advertisement slider placeholder is present in the DOM and visible as a defined area.
- Placeholder supports images and banners of standard IAB ad sizes.
- No live ad serving is required in Phase 1.

US-06: Enquire or Sign Up

As a visitor ready to proceed, I want a clear call-to-action, so I can quickly book or enquire about the concierge service.

Acceptance Criteria

- At least 3 CTA touchpoints exist across the page: Hero, Benefits section, and bottom of page.
- CTA buttons include 'Book Concierge Service', 'Talk to a Care Manager', and 'Get Exclusive Deals'.
- WhatsApp and phone CTA are present in footer for senior users.

8. Functional Requirements

ID	Module	Requirement	Acceptance Criteria
FR-01	Hero Section	Prominent banner with headline 'Premium Concierge Services for Senior Care', sub-headline, and primary CTA button.	Hero visible above fold; CTA links to enquiry form.
FR-02	Service Overview	Explanation of concierge service with category icons (medical, lifestyle, emergency, mobility).	Icons render; copy is plain language; section loads within 1.5s.
FR-03	Benefits Section	Card-style layout highlighting: Faster Support, Trusted Partners, Exclusive Discounts, Senior-friendly Service, Priority Assistance.	5 benefit cards render; layout is responsive.
FR-04	Category Filter	Dropdown listing subcategories: Covid-Special, Lab & Diagnostic, Home Health Care, Doctor's Consultation, Home Services, Health Support, Concierge.	Selecting category filters offer cards; 'View All' resets filter.
FR-05	Location Filter	Dropdown for Delhi NCR and Pan India; filters offers by serviceability.	Offers update on selection without full reload.

FR-06	Partner Brands Showcase	Carousel or grid displaying partner logos (1mg, Pathkind, LegalKart, Archies, Jiva Ayurveda, Easy Book My Lab, etc.).	Logos clickable; carousel auto-scrolls on desktop; grid on mobile.
FR-07	Assure Deals Cards	Cards with: deal description, partner logo, discount %, serviceability, address, validity date, CTA button.	Cards render with all fields; CTA triggers enquiry flow.
FR-08	Featured Deal	Highlighted 'Deal of the Week' card with visual distinction.	Featured card has distinct border or badge; appears first in grid.
FR-09	Special Care Services	Highlight premium services: Personal Care, Emergency Coordination, Telemedicine, Doctor Appointment Mgmt, Mobility & Transport.	Section present; icons used; links to relevant service pages.
FR-10	Membership/Subscription Offers	Display exclusive membership-only deals (e.g. flat 30% on yoga/meditation).	Section labelled 'Membership Offers'; distinct from standard deals.
FR-11	Free Entry Offers	Display free-entry benefits (e.g., Art of Living virtual classes).	Section labelled 'Free Entry'; cards include event details and CTA.
FR-12	Brands Filter	Checkbox list of brand names for filtering offers.	Multi-select brands update displayed offer cards in real time.
FR-13	FAQ Section	Answers to: What is concierge? Who is eligible? What are charges? What benefits are included?	Minimum 5 FAQs; expandable accordion pattern.
FR-14	CTA Buttons	CTAs at Hero, Benefits, and page bottom: 'Book Concierge Service', 'Talk to a Care Manager', 'Get Exclusive Deals'.	All 3 CTAs functional; link to enquiry page or phone.
FR-15	Ad Slider Placeholder	Reserved DOM area for future advertisement banners (non-functional in Phase 1).	Placeholder container present; marked with comment in source code.
FR-16	Footer	Contact details, WhatsApp/call CTA (0806 8970 746), social media icons, quick navigation links.	Footer present on all scroll positions; phone number clickable.
FR-17	SEO	Page title, meta description, H1/H2 hierarchy, alt text for all images, canonical URL.	Lighthouse SEO score ≥ 90; page indexed within 7 days of launch.
FR-18	Nearby Me	Button/filter to redirect to a sub-page showing location-specific offers.	Clicking 'Near By Me' navigates to location-filtered deal page.

9. Non-Functional Requirements

9.1 Performance

- Page load time: < 3 seconds on 4G mobile.
- Largest Contentful Paint (LCP): < 2.5 seconds.
- Cumulative Layout Shift (CLS): < 0.1.

9.2 Accessibility

- WCAG 2.1 AA compliance — senior-friendly font sizes (minimum 16px body).
- High contrast ratio (minimum 4.5:1) for all text.
- All images to have descriptive alt text.

9.3 Responsiveness

- Fully responsive: Desktop (1280px+), Tablet (768px), Mobile (375px).
- Touch targets minimum 44×44px on mobile.

9.4 Security

- No PII stored on landing page — all form data sent to secure backend.
- HTTPS enforced; no mixed content.

---

10. Annotated Wireframes

The following wireframes describe the page layout and component structure. These are low-fidelity schematics for handoff to the Design team. Refer to the uploaded PDF mockup (Landing_Page.pdf) for visual reference.

10.1 Navigation Bar

```
[ NAVIGATION BAR ]
| EMOHA Logo (left)  |  Phone: 0806 8970 746  |  [Sign Up] button (right) |
|-------------------------------------------------------------------------|
| [EXCLUSIVE DISCOUNTS] | [MEMBERSHIP OFFERS] | [FREE ENTRY] | [NEAR BY ME]|
|-------------------------------------------------------------------------|
| □  Search for Products, Services...                            [□] |
```

Annotation: Navigation persists on scroll (sticky). 'Near By Me' button triggers location-based filtering sub-page. Search bar is full-width below nav tabs.

10.2 Hero / Advertisement Slider

```
[ HERO — ADVERTISEMENT SLIDER PLACEHOLDER ]
|                                                                  |
|      [ADVERTISEMENT BANNER — Phase 2 Placeholder]                |
|      Featured Partner Logo   +   Value Proposition Copy          |
```

```
|      e.g. '1mg — Bringing Care to Health'                              |
|                                                                        |
|  Popular Brand:  VIEW ALL  [1mg] [Ferns&Petals] [Archies]             |
|                            [JIVA] [PathKind]                           |
```

Annotation: Left side shows main featured brand with full-width banner. Right panel shows 'Popular Brands' quick-access grid. Slider auto-rotates every 5s. Phase 1: static image. Phase 2: live ad network.

10.3 Filters Panel

```
[ FILTERS PANEL (Left Sidebar) ]
| FILTERS                                          [Search Bar]        |
|-----------------------------------------------------------------------|
| CATEGORIES           VIEW ALL |  SUB-CATEGORIES          VIEW ALL    |
| [ ] Covid - Special           |  [ ] Sub-cat 1                       |
| [ ] Lab & Diagnostic          |  [ ] Sub-cat 2                       |
| [ ] Home Health Care          |  [ ] Sub-cat 3                       |
| [ ] Doctor's Consultation     |                                      |
| [ ] Home Services             |  BRANDS                  VIEW ALL    |
| [ ] Health Support            |  [ ] Pathkind                        |
| [ ] Concierge                 |  [ ] Manansha                        |
|                               |  [ ] Legalkart                       |
| LOCATION dropdown  [Delhi NCR▼]  [ ] Easy Book My Lab               |
| CATEGORY dropdown  [All       ▼]  [ ] 1MG                           |
```

Annotation: Three filter types — Categories (single-select), Sub-categories (multi-select), and Brands (multi-select checkbox). Elders can apply up to three filters simultaneously. Filters update offer cards in real time. Location + Category dropdowns at top-right as quick-access controls.

10.4 Offer Cards Grid

```
[ OFFER CARDS — MAIN CONTENT AREA ]
| ┌──────────────────────┐  ┌──────────────────────┐          |
| │  [Partner Logo]  15%▸ │  │  [Partner Logo]  30%▸ │          |
| │  DISCOUNT             │  │  DISCOUNT             │          |
| │  Partner Name         │  │  Partner Name         │          |
| │  (Category)           │  │  (Category)           │          |
| │  Serviceable in: ____ │  │  Serviceable in: ____ │          |
| │  Address: _________   │  │  Address: _________   │          |
| │  [CTA Button]         │  │  [CTA Button]         │          |
| └──────────────────────┘  └──────────────────────┘          |
| ┌──────────────────────┐                                      |
```

```
| │  [Partner Logo]   20%▶  │   (Grid continues...)                  |
| └──────────────────────────┘                                        |
```

Annotation: Two-column grid on desktop; single-column on mobile. Discount badge on right edge (vertical, coloured stripe). Card contains: logo, category label, partner name, serviceability area, address, and CTA. Featured Deal gets a highlighted border + badge. Cards filtered dynamically by left-panel filters.

10.5 Right-Side Annotation Panel (per mockup)

```
[ ANNOTATION LEGEND (right of page in mockup) ]
| CATEGORIES dropdown   → Dropdown of all concierge categories         |
| LOCATION dropdown     → Delhi NCR & Pan India service provider list  |
| POPULAR BRANDS        → Clicking shows brand name + logo only        |
| NEARBY ME             → Redirects to location + category filtered pg |
| EXCLUSIVE DISCOUNTS   → Normal partner discounts (e.g. 40% LegalKrt)|
| MEMBERSHIP OFFERS     → Membership-only deals (e.g. 30% yoga)       |
| FREE ENTRY            → Free virtual class access (Art of Living)    |
| PROCESS               → Elders call customer number or IRM to avail  |
| T&C APPLY             → Terms & Conditions footer note               |
| DECLARATION           → Disclaimer / legal copy                      |
```

Annotation: This panel from the wireframe PDF maps each UI element to its business function. All annotations above must be reflected in the design specifications handed to the UI/UX team.

11. Information Architecture & Page Flow

The page follows a top-down conversion funnel:

```
[ PAGE FLOW (Top to Bottom) ]
  [1] Sticky Navigation Bar + Search
        └── Nav tabs: Exclusive Discounts | Membership Offers | Free Entry | Near By Me
  [2] Hero / Advertisement Slider (Phase 1: static | Phase 2: live ads)
        └── Popular Brands quick-access grid
  [3] Filter Panel (sidebar) + Offer Cards Grid (main)
        ├── Category filter | Sub-category filter | Brand filter
        ├── Location dropdown + Category dropdown
        └── Offer cards: Exclusive | Membership | Free Entry
  [4] Special Care Services Section
  [5] CTA Strip — 'Book Concierge Service' | 'Talk to a Care Manager'
  [6] FAQ Accordion
```

```
[7] Footer — Contact | WhatsApp | Social | Quick Links | T&C | Declaration
```

12. Dependencies & Assumptions

12.1 Dependencies

- Design team to produce high-fidelity Figma mockups based on this PRD.
- Marketing team to provide final copy, partner logos, and deal content.
- Partner brands to confirm deal validity dates and serviceability areas before launch.
- Dev team to confirm CMS capability for future dynamic deal updates.
- SEO team to provide target keywords for meta content.

12.2 Assumptions

- Phase 1 deals will be hardcoded or managed via a simple CMS field.
- Location detection for 'Near By Me' will use browser geolocation or IP lookup.
- Advertisement slider in Phase 1 is a static image placeholder — no ad network integration.
- WhatsApp CTA links to existing Emoha WhatsApp business number.

13. Risks & Mitigations

Metric	Target / Expected Improvement
Deal content not ready at launch	Marketing to finalize deals 2 weeks before launch; placeholder cards as fallback.
Partner logos unavailable	Use brand name text as fallback until logos are supplied.
Senior users find page complex	UX review with accessibility audit; large font, high contrast, phone CTA prominent.
Filter logic performance on mobile	Implement client-side filtering with debounce; lazy-load off-screen cards.
SEO indexing delay	Submit sitemap immediately post-launch; add canonical tags day one.

14. Indicative Timeline

Week 1–2	BRD / PRD sign-off | Figma high-fidelity design
Week 3	Design review & stakeholder approval

Week 4–5	Frontend development (HTML/CSS/JS)
Week 6	QA: functional testing, responsive testing, accessibility audit
Week 7	UAT with Marketing & Operations teams
Week 8	Go-live | SEO submission | Analytics setup
Phase 2 (TBD)	Ad slider integration | CMS for dynamic deal management

15. Open Questions for Stakeholders

- Should the 'Near By Me' feature use browser geolocation or a manual city selection?
- Will deals be updated via a CMS or will dev support be required each cycle?
- What is the primary CTA destination — a form, a phone call, or a WhatsApp chat?
- Is there a minimum number of partner brands required at launch?
- Should the advertisement slider placeholder be visible to users or hidden (CSS display:none)?
- Are there brand guidelines that restrict color palette beyond Emoha red?

Sign-Off

This document requires review and approval from the following stakeholders before design and development begins:

Stakeholder / Role	Name	Approval & Date
Product Manager		
Marketing Lead		
Design Lead		
Engineering Lead		
Senior Management
